DETAILED ACTION

Claim Rejections - 35 USC § 102

1. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(e) the invention was described in (1) an application for patent, published under section 122(b), by another filed in the United States before the invention by the applicant for patent or (2) a patent granted on an application for patent by another filed in the United States before the invention by the applicant for patent, except that an international application filed under the treaty defined in section 351(a) shall have the effects for purposes of this subsection of an application filed in the United States only if the international application designated the United States and was published under Article 21(2) of such treaty in the English language.

2. **Claims 1, 3, 7 and 9** are rejected under 35 U.S.C. 102(e) as being anticipated by U.S. Patent No. 6,616,350 B1 to *de Boer et al.* (“*de Boer*”).

As to **claim 1**, recited steps (a) and (b) of a bidirectional line switched ring (BLSR) are known in the prior art as e.g., per GR-1230-CORE issue 4 (e.g., see applicant’s admission on page 13, lines 1-13). In addition, steps (a) and (b) are further taught by *de Boeri* e.g., at column 10, line 14 through column 11, lines 16). At issue is a reasonable but broad interpretation of step (c). In particular, at issue is a reasonable but broad interpretation of “holding the ring switch request [SF-R] as internal request”. As such see e.g., column 12, lines 28-40 with emphasis on multiple failures.

As to **claim 3**, see rejection for claim 1.

As to **claim 7**, see similar rejection to claim 1.

As to **claim 9**, see rejection for claim 8.

Art Unit: 2663

Allowable Subject Matter

3. **Claims 2, 4-6, 8, 10-12** are objected to as being dependent upon a rejected base claim, but would be allowable if rewritten in independent form including all of the limitations of the base claim and any intervening claims.

Conclusion

4. The prior art made of record and not relied upon is considered pertinent to applicant's disclosure.

- US006269452B1 discloses removing protection for a lower priority connection for two-fiber BLSR.
